

Portable Multi-Gas Detector

Industrial Safety Technologies (The Woodlands, TX), owner of Detcon and GMI, recently introduced the PS200 portable multi-gas detector. The PS200 monitors and displays up to four hazardous gas conditions simultaneously. Both lightweight and durable, it uses catalytic bead sensor technology to monitor and detect a wide range of combustible gases, and electrochemical sensor technology to monitor and detect carbon monoxide, hydrogen sulfide, and oxygen deficiency. The PS200 is housed in a sturdy, water resistant dust-proof case to ensure superior reliability and durability in harsh environments and confined spaces. Maximum and minimum gas concentrations for each sensor can also be programmed and monitored.
