Deep Cut Band Saws

Milwaukee Tool Corporation (Milwaukee, WI) continues to demonstrate a focused commitment to corded product with the launch of four new Deep Cut Band Saws that provide more durability while still delivering on the heritage of long-term reliability and performance that make Milwaukee Band Saws the industry standard for professional tradesmen. The new saws feature Milwaukee's new patent pending motor technology that packs more copper in a smaller amount of space. This technology allows for a much slimmer motor housing, which increases the user's line of sight to ultimately deliver more accurate cuts. Balance is also improved with this design, allowing the tool to rest naturally and comfortably in the user's hands to provide better control.
