

Electric Wire Rope Hoists

Harrington Hoists, Inc. (Manheim, PA) has launched a new line of Electric Wire Rope Hoists, the RHN Series. These hoists are offered in two configurations, the Deck/Base Mounted hoist in 2-20 metric tons and the Ultra-Low Headroom trolley hoist in 2-15 metric tons. Both versions are dual speed. The Deck/Base Mounted hoist features a compact, modular design, ideal for stationary applications or combined with a double girder trolley for double girder crane systems. The Ultra-Low Headroom trolley hoist is ideal for top running and underhung overhead bridge cranes. The compact body results in the longest hook travel possible in facilities with limited space. These hoists offer a lifetime lubricated gear box and an electromagnetic brake that never needs adjustment.
