

Modular Workstation System

Lista International Corporation (Holliston, MA) presents the Arlink 8000 Modular Workstation System. Ergonomically designed, these modular workstations offer unlimited flexibility to accommodate changing needs. Ideal for a variety of applications, such as assembly, computing environments, service, repair, and technical work, Arlink 8000 workstations can be assembled and reconfigured faster than other workstations, saving time and money. Each workstation can be configured in a variety of heights and lengths to best suit specific needs. These workstations are available in five standard industry widths and in three different heights up to 84 inches. The unique “starter and adder” system, with the option of back-to-back configurations, enables layout possibilities to support any process requirements.
