

## Quick Disconnect Couplings

**Colder Products Company** (St. Paul, MN) has introduced the NS212 quick disconnect couplings to meet the need for smaller, cost-effective, non-spill fluid connectors in a wide range of applications. NS212 couplings give users versatility and broad chemical compatibility for printing and ink management, electronic cooling, analytical instrumentation, and other applications. The NS212 couplings offer an easy, twist-to-connect locking mechanism and double-sided non-spill shutoff valves in a space-saving design. The new couplings also feature very low air inclusion, air induced into the coupling upon connection, minimizing contaminants and reducing the need to purge fluid lines.
