

## Field-Assembled Cassettes

To replace energy recovery ventilation wheels, Airxchange FA Series field-assembled cassettes from **Airxchange** (Rockland, MA) can reduce installation times and costs. Cassettes are factory-built, tested, marked for reassembly, and then disassembled for shipment. Replacing large, cumbersome energy recovery wheels in limited-access areas often require large building openings, sizable installation areas, and possibly a crane. With the Airxchange FA Series, each cassette is precision cut into sections for delivery through standard doorways and rapid on-site assembly. Airxchange products are performance certified by the Air-Conditioning and Refrigeration Institute and listed with Underwriters Laboratories for fire safety.
