

Leak Detection Flashlight

Spectronics Corporation (Westbury, NY) has unveiled the new Spectroline® OPX-3000 OPTIMAX™ 3000 portable fluorescent leak detection flashlight. With its focused beam, the OPTIMAX™ 3000 makes it easy for technicians to pinpoint all refrigerant leaks—even elusive leaks that may be missed by other methods of leak detection. The OPTIMAX™ 3000 uses super-hi-flux LED technology to deliver 15 times brighter leak detection light than regular LED lamps. Its power equals that of 150-watt lamps that must be plugged into an AC power source, and it has an inspection range of up to 20 feet or more. Powered by a rechargeable NiMH battery, the unit has a 50,000-hour LED life.
