

## Pump Search Engine

The screenshot shows the PumpScout.com website. At the top, it says "PumpScout Your Guide to Pump Manufacturers & Suppliers". Below this, there's a navigation bar with "Pump Supplier Directory", "Expert Advice", and "Industry Updates". The main content area features a large heading: "Connect with pump suppliers. Get FREE quotes!". To the left, there's a three-step process: 1. Tell us what pump you need, 2. We'll connect you with suppliers, 3. Compare quotes & save money. To the right, there's a "Start Here" section with a form containing "Select your industry", "Select your Pump Type", and "Enter Zip Code", followed by a "Get Results >>" button. Below the form, there's a section titled "Get quotes from these leading pump suppliers" with logos for abs, AMT, and others. At the bottom, there's a section titled "Your go-to guides for pumps and pump suppliers" with links to "Getting started - Four tips for starting the pump buying process", "Pump Types Guide - Find the right pump for the job", and "20 pump industry terms you should know".

**PumpScout.com** (Tacoma, WA) is a dynamic search engine that helps pump buyers—from engineers and maintenance professionals to farmers and contractors—get price quotes on products. The system is fast and easy for customers and suppliers. The website invites buyers to enter the criteria for their pump, and then identifies suppliers that sell the pump they need. Pump buyers can specify whether they'd like service from a local or national supplier. The site includes tips and tools from experts in the fluid handling industry, and the comprehensive Pump Types Guide is an easy-to-use reference for pump buyers who need to identify the right pump type(s) for their application.
