

Single Loop Controller

The **Yokogawa Corporation of America** (Newnan, GA) has announced that its Single Loop Controller, the YS1700, is now qualified for non-safety seismic and safety seismic applications. For years the YS series of controllers have provided reliable and accurate control for many industries. Now customers can have world class control with Yokogawa's latest SLC product. The YS1700 has improved features such as dual CPUs with automatic fail over, which provides display and manual control capability if an abnormality occurs in one of the CPUs. Other features include a hard manual backup, battery free memory backup, and backwards compatibility with all previous YS control products.
