

Super Power Pusher

NuStar, Inc. (Shakopee, MN) has introduced the Super Power Pusher® pedestrian-operated, battery-powered pusher. It can push, pull, and maneuver virtually any heavy industrial load on wheels and uses its own modular range of attachments for handling rolling loads up to 150,000 pounds, or those with high rolling resistance. With a footprint of less than 9 square yards, it is easy to store and move from site to site. It recharges using a standard 110 volt outlet. Because it's battery operated, it does not require liquid fuels and doesn't emit any fumes.

Check it out at www.powerpusher.com [1].
