

## Kwik Mark Marker

The Kwik Mark marker from **Kwik Mark, Inc.** (McHenry, IL) is a chip-less engraver ideal for marking tags, legends, and machine parts with high resolution images. The unique dot peen process “floats” on the material surface during the marking operation, making it ideal for flat, curved, and irregular surfaces. The system has built-in serializing, date coding, and graphic engraving functions. The unit is self contained, requiring no PC for operation, and features a dual memory embedded processor with a compact flash card. It includes a detachable keyboard as well. If it gets damaged, just replace it with a standard PS-2 keyboard.
