

Stainless Steel Shelving

Quantum Storage Systems

Quantum Storage Systems (Miami, FL) has announced an inventory expansion of its stainless steel wire shelving line. In stock for immediate delivery, the shelving is offered in all sizes from 14-inches deep to 72-inches long, with 600 to 800 pound capacity per shelf. Quantum now provided 25 shelf sizes and five post heights as well as stainless steel accessories such as dividers and ledges. Quantum's stainless steel wire shelving, with its all welded construction with additional wire trussing for high strength, is the ideal storage solution for any application where corrosion is a concern. Wire allows air to circulate, light to penetrate for increased product visibility, and minimal dirt accumulation.
