Vitesse Controller

Yokogawa

Yokogawa (Newnan, GA) announces the newest addition to its FA-M3 PLC family—the Vitesse Controller. According to the company, it is designed to offer scan speeds clocked executing 100,000 program steps in 1 millisecond. The Vitesse controller also features an on-board Ethernet port, USB port, and a SD card slot. Communications with Modbus TCP/IP devices are meant to be simple with the built-in Ethernet port, as well as programming and remote OME (operation, maintenance, and engineering).
