

Giganetix GigE Cameras

Smartek

Framos has announced **Smartek's** (Camberley, UK) new extended series of low cost Giganetix GigE cameras, which now supports 6 sensor variants from Truesense Imaging (formerly Kodak). This comes along with an increased bit depth option of 14bits. These fully GigE Vision® compliant cameras have a compact 35x35x48 millimeter housing for simple integration into existing and space restrictive systems. Smartek has applied its experience and expertise to these cameras offering superior image quality with minimal thermal noise. Smartek uses industrial standards such as C-mount, RJ45, and Hirose connections, with CAT5e or CAT6 cables to reduce overall cost without compromising quality.
