

Mobile MRO Workstations

Lista International Corporation

Lista International Corporation (Holliston, MA) has introduced its durable Mobile MRO Workstations, which are mini workstations and high-density storage cabinets on wheels. These storage solutions can be easily maneuvered to bring parts, tools, supplies, and equipment directly to job sites, saving time and increasing productivity. These workstations feature built-in shelf storage behind a lockable door and drawer storage to accommodate a wide range of items. They are offered with a selection of work surfaces, including durable butcher block and galvanized steel. Cabinet drawers each provide a 440-pound load capacity, and include Lista's patented PrevenTip one-drawer-at-a-time interlock safety system to prevent accidental tipping. Each drawer also has individual latches, which secure drawers closed for safe transport.
