

## Thermal Edge

Thermal Edge

Overheating electrical enclosures shut down critical systems, effect precise measurement processes, and create overall havoc in the manufacturing industry. Anywhere there is an electrical enclosure with heat sensitive systems, air conditioners or air to air heat exchangers will provide temperature controls to keep these sensitive systems running. **Thermal Edge** (Irving, TX) is an American manufacturer of enclosure air conditioners, heat exchangers, and filtered fan packages. With 1,000 BTU/H to 24,000 BTU/H systems, Thermal Edge can keep control systems cool and clean with its closed loop UL Listed air conditioners. A programmable digital controller and condensate evaporation is included on every unit. Thermal Edge units fit 8-inch and larger enclosures.
