

Industrial-Grade Labels

CILS

Impossible to cleanly remove, new CILS-9200V industrial-grade security labels from **Computer Imprintable Label Systems** (Burlington, MA) display an immediate 'VOID' warning message on attempted removal, providing failsafe product protection in minutes, straight from an existing PC and standard office printer, says the company. The high-strength, fast-curing CILS adhesive provides an instant bond to all smooth, textured, powder-coated, and oily surfaces and is ideal for product warranty, liability, and safety applications. Variable data can be added 'in-house, on-demand' from a standard laser or thermal transfer printer, providing an instant ultra-durable security solution 'at the click of a button'.

For more information on the CILS 'VOID' Evident security label range, visit www.cils-international.com [1].
