## Maneuver Any Load On Wheels

NuStar, Inc.

**NuStar, Inc.** (Shakopee, MN) has introduced a new stainless steel Power Tug™ pedestrian-operated, battery-powered tug. It can push, pull, and maneuver virtually any load on wheels and uses its own modular range of attachments for handling rolling loads with high rolling resistance, says the company. The stainless steel Power Tug™ fits snugly up to the load and its actuator grabs and locks onto the framework to safely move tanks, carts, or dollies. It is designed to safely maneuver carts or apparatus that have 4 swivel casters or 2 swivel and 2 fixed casters. The Power Tug is designed to allow one person to move wheeled loads weighing up to 5,000 pounds without forklifts or other expensive ride-on equipment.
