

# Remote Door Monitoring Technology

Albany

**Albany** (Lawrenceville, GA) has announced that, for a limited time, all ThermaChill and ThermaFreeze doors will include smart, new Remote Monitoring technology. This unique system allows users to monitor a cold storage door at any time, and from anywhere, according to the company. Remote Monitoring can preempt and prevent disastrous situations and this system allows users to conveniently monitor all Albany doors at a facility from a remote location, saving time and money. The ThermaChill can reduce energy costs and increase productivity with fast opening speeds of up to 130 inches per second. Albany's ThermaFreeze door can be equipped with the UltraDefrost System and heated side frames to protect against extreme humidity and prevent ice build-up. ThermaChill or ThermaFreeze door orders will receive a free six-month trial of the Remote Monitoring service.
