

Rung Runner Ladder Caddy

U-TECK

U-TECK (Fayetteville, NC) has announced the availability of its newly redesigned Rung Runner™ Ladder Caddy. The new design expands upon the functionality of the first-generation Rung Runner by introducing a universal tether that enables users to carry ladders of any type and size, including large extension ladders with solid rails. The product's innovative design provides an easy and stable means of transporting ladders by off-setting nearly 90 percent of the ladder's weight, reducing worker fatigue and helping prevent injuries, according to the company. With a durable framework constructed of lightweight polymer and stainless steel, the Rung Runner also helps increase single worker productivity and decreases property damage.
