The Tool Valet

Tool Valet

The Tool Valet by **Tool Valet** (Salt Lake City, UT) is not just a tool board or tool box on wheels. It is mobile and designed with a 24- by 24-inch base that enables it to be maneuvered close to where the work is. Because the shelves on the Tool Valet are slanted, the pins that hold the tools in place simply keep the tool from sliding off the tray. There is no need to put the tool back on a cumbersome hook or clamp the tool. The height of the trays are adjustable so mechanics can have access to ergonomically positioned tools. Its mast is configured so cords can be routed through it and its base could also hold a garbage can, tool box, or compressed air tank.
