## Houdini Spinner

AmeriVap Systems

**AmeriVap Systems** (Dawsonville, GA) has announced the Houdini Spinner, a revolutionary attachment for floors, walls, and other hard surface cleaning in industrial operations, says the company. The AmeriVap Houdini Spinner is able to tackle multiple applications, including diamond floor plate cleaning, removing and stripping wax build-up on VCT and vinyl flooring, and cleaning rubber floors. The blades on the patented, 8- and 12-foot spinner head rotate at 1250 rpm while firing dry steam vapor at 220 degrees F onto the surface at 150 psi, allowing for tremendous cleaning and sanitizing power. Continuous extraction means that dirt, grime, and grease are not redistributed but powered off surfaces and collected in the vacuum extraction chamber for disposal.
