

Industrial Air Compressors

Atlas Copco Compressors

Atlas Copco Compressors (Commerce City, CO) has improved its GA line of industrial air compressors with a next generation of oil-injected screw compressors that can deliver an average of 35 percent energy savings, according to the company. The GA is available in three options: the GA 37-90 VSD (50 to 125 hp); the GA 30+-75+ (40 to 100 hp) premium fixed-speed variant; and the GA 37-90 (50 to 125 hp), which delivers Free Air Delivery in a base package. The new GA also features a “cool canopy” that helps drive performance, efficiency, and serviceability. The GA’s high efficiency screw rotor elements have decreased by an average of 18 degrees F. The entire GA line features improvements to the oil-treatment system, resulting in up to 50 percent less oil use and fewer maintenance demands.
