B 60 Scrubber

Kärcher

Kärcher (Camas, WA) has introduced the new B 60 Scrubber. The Kärcher B 60 features traction drive, walk-behind scrubbers; nearly a 16 gallon fresh and recovery tank-in-tank design; tool-free interchangeable modular disc or cylindrical scrubbing heads, a 33.5-inch vacuum squeegee; and Kärcher's Intelligent Key (KIK) system. Its slim design is ideal for narrow passages and irregularly shaped areas, and low operating noise output makes it suitable for cleaning noise-sensitive areas. The KIK system enables a facility manager to program unique cleaning profiles, making it easier to train users and operate the scrubber, says the company, and can be used to set varying levels of authorized access.
