

Continuous Duty Vacuums

VAC-U-MAX

VAC-U-MAX (Belleville, NJ) has introduced the next generation of its model 1020 continuous duty industrial vacuum, the VAC-U-MAX Model 1050, which boasts 100 percent more filter area for increased efficiency, a unique atmospheric blowback system that allows filter cleaning with power on, larger wheels for maneuverability, and reduced noise levels, making the 1050 the quietest industrial vacuum in the industry, according to the company. Two of the most significant improvements are the unit's increased filter capacity which enhances the ability to handle finer powders and filter them more efficiently reducing the load on the vacuum producer, and the new unique atmospheric blowback system.
