## Nupla Pry Bars

Nupla

**Nupla** (Sun Valley, CA) Pry Bars, a 50,000 strand composite of Nuplaglas® molded inside a weather resistant polypropylene jacket, are bonded to drop forged and hardened steel point and wedge ends. These composite handled tools perform like steel bars, according to the company, and are available lengths of 30- to 50 inches. Lighter than comparable steel pry bars, Nuplaglas® handled Pry Bars are insulated from heat, cold, and electrical shock and are strong enough to carry the Nupla Lifetime Warranty, says the company. Steel ends are attached with the NuplaBond® system.

*See the Pry Bars and a complete selection of Nupla Industrial Tools at [www.nuplcorp.com](http://www.nuplcorp.com) [1].*
