## Reliable Sorting Unit

W&H Systems, Inc.

**W&H Systems, Inc.** (Carlstadt, NJ) has introduced a High-Speed, Tilted-Tray Reliable Sorting Unit (RSUHS), to provide a durable, low-cost, and accurate method of sorting a wide range of products, says the company. The flexible nature of the RSU enables unique system configurations, while the design allows for a low up front investment and maintenance costs. The sorter features tilted carrying trays traveling on an enclosed track conveyor. Items are inducted onto the trays manually or automatically. Trays are presented to the induction area in a horizontal position and later tilted for sorting. At the pre-defined sort points, doors open on the carrying trays to gently discharge the product. Items slide from the trays to their proper chute or directly into their shipping carton.
