## Stackable Shelf Bins

Quantum Storage Systems

**Quantum Storage Systems** (Miami, FL) has announced its new line of Stackable Shelf Bins. These durable polypropylene bins feature sizes that are an industry first, says the company. They have a built-in rear hanger that allows the bin to hang from louvered panels and rails and the bin's raised front opening allows the user to maximize the complete bin's storage capacity. Optional cross dividers allow flexibility and keep parts organized. Waterproof bins resist rust and corrosion. The bins are available in black, blue, gray, ivory, and orange; and offered in many sizes. Autoclavable and resistant to extreme cold, they are manufactured in the U.S.A.
