

VaporTrap

Justrite

Justrite's (Des Plaines, IL) VaporTrap™ filter improves the work environment by reducing harmful VOCs found inside safety cabinets containing flammable liquids, says the company. An activated carbon cartridge adsorbs harmful volatile organic chemical vapors to reduce employee's inhalation exposure and lowers emissions of VOCs into the atmosphere. A sturdy magnetized base offers flexible placement anywhere within the cabinet, while a date notation area on the label serves as a reminder for replacement.
