

12 Ounce Aerosol IPA

Techspray

Techspray (Amarillo, TX) has introduced E-LINE IPA (part #1610-12S) Isopropyl Alcohol (IPA) in new, convenient 12 ounce aerosol package. 99.8 percent pure anhydrous (minimal water) IPA is excellent for defluxing, fiber optics maintenance, stencil cleaning, tool cleaning, tape-head cleaning, and other light-duty cleaning, says the company. E-LINE IPA is fully compliant with California CARB requirements, in addition to European REACH and WEEE initiatives. It does not contain RoHS restricted substances, SVHC listed substances, or halides. Techspray offers IPA in other configurations including pints, gallons, drums, and pre-saturated wipes. In addition to the 99.8 percent grade that is common for electronics cleaning and flux thinning, 70 percent IPA/30 percent DI is available to lower the cost and slow evaporation.
