

Economical Manufacturing Cells

German Machine Tools Of America

Pittler, part of **German Machine Tools Of America** (Ann Arbor, MI) presents its third generation of the PV series and provides its customers with the most economical manufacturing cell in the company's 125-year history, it says. PV3 combines different technologies such as turning, drilling, thread cutting, milling, groove milling or grinding and gear tooth forming as well as hard turning and grinding including the integrated quality assurance in a monitored process in a single machine. The heavy machine production series PV HDC (heavy duty cutting) has also been developed with a chip removal rate up to 20 millimeters².
