ET Series Casters

The Revvo Caster Company, Inc.

The Revvo Caster Company, Inc. (West Seneca, NY) has introduced ET Series casters, designed to move moderate loads via manual propulsion. Four-inch diameter swivel models are available with an optional fixed-position brake that mounts to the top plate so the brake is always in the same easy-to-access position regardless of which way the swivel wheel is facing. New ET Series swivel models feature a double-ball raceway for smooth directional movement with the capability to withstand shock loading, Revvo Caster states. Fixed and swivel models are available in wheel sizes of 4- and 5-inch diameter with load capacities ranging from 264 to 550 pounds. Wheel types include polyurethane-on-nylon with roller bearings, and black nylon or blue rubber with precision ball bearings. Fixed models have an oblong top plate.
