

## **HYDE Turbo Nozzle**

HYDE

The new **HYDE**® (Southbridge, MA) Turbo Nozzle is a powerful new ceramic tip designed for blasting and removing stubborn and encrusted stains. It uses a technique that combines the best of both worlds: high impact and good cleaning coverage, explains the company. Turbo nozzles provide roughly five times the cleaning power of standard tips. Turbo Nozzle produces a high-pressure pencil jet stream and rotates it at 3000 RPM creating a 4- to 8-inch cleaning circle. This technique expands the coverage area for cleaning without diminishing the velocity created by concentrating the water stream. The HYDE® Turbo Nozzle fits most consumer-grade pressure washers with quick-connect style connections and includes a ¼-inch male quick-connect plug (AL-PLUG 1/4mB).
