Insulator Dock Seal

Frommelt Products Corporation

Frommelt Products Corporation (Milwaukee, WI), a division of Rite-Hite Corp., has introduced the Insulator Dock Seal with Light-blocking Header, the most durable dock seal available and the first one with a header that effectively seals small light gaps caused by trailer protrusions, according to the company. The Insulator Dock Seal design is comprised of exclusive features that protect against extreme wear and tear, lengthening the life of the seal. For example, all trailer and forklift contact surfaces are reinforced with high-strength Durathon™ fabric over a flexible vinyl base fabric for extreme wear resistance. Durathon's pebble-grained coating creates a friction-resistant surface that trailers slide against rather than abrade.
