

## Rgrip Gripping Strength

REGO-FIX

As a new feature of **REGO-FIX**'s (Indianapolis, IN) powRgrip® product series, which includes holders, collets, and a mini-press, secuRgrip works by utilizing the powRgrip's tremendous gripping strength in conjunction with a patented locking system and threaded cap, explains the company. With secuRgrip's added levels of cutting tool security, manufacturers can experience greater confidence when machining castings and materials or complex parts. The secuRgrip system has a TIR of 0.0001 inch and enables manufacturers to preset their tool heights. Furthermore, REGO-FIX customers can modify their existing powRgrip holders for use with the system.
