

SumpDoc

Eriez® Hydroflow®

Eriez® Hydroflow® (Erie, PA) has introduced SumpDoc™, a portable inline fluid reclamation machine that provides complete coolant restoration and rejuvenation treatment of the metalworking fluids in the machine tool sump with minimal operator interface. There is no interruption in the production cycle or need to transport fluids, says the company. Features of the SumpDoc include a sump vac for removal of sludge and solids 50-micron and larger, a pleated bag filter for removal of solids down to 10-micron, and a high speed centrifuge for removal of emulsified tramp oil and fines down to three to five micron. All components are housed on a mobile platform for ease of transportation.
