U-Shaped Floor Scales

METTLER TOLEDO

METTLER TOLEDO (Columbus, OH) is pleased to introduce a new line of U-shaped floor scale products. Included within this line is the PTA464 low-profile pallet scale, ideally suited for the dry environments found in the warehousing, discrete manufacturing, and shipping/receiving markets. The PTA464's U-shaped platform simplifies the job of loading pallets and containers onto the scale, says the company. There are no ramps or pits, so the scale costs less to install, saves space, and speeds up loading and weighing. PTA464 pallet scales are customizable to meet a variety of weighing needs. All models are available in capacities from 1,000 up to 5,000 pounds.

For additional details on the new line of U-shaped floor scales, visit www.mt.com [1].
