## Coreblast Transfer Hose

Fluid Hose & Coupling, Inc.

**Fluid Hose & Coupling, Inc.** (Mississauga, Ontario, Canada) has introduced Coreblast transfer hose to the North American market. Coreblast is an industrial waste and raw material transfer hose that is highly corrosion and abrasion resistant, allowing extended usage and thereby avoiding constant replacement, says the company. Coreblast is produced with a high quality polyurethane tube and reinforced with steel wire helix. The cover is corrugated CR black that is abrasion, aging, ozone, and flame resistant. It is completed with a distinctive cloth finish. Coreblast can handle a temperature between -30 C and +100 degrees C, and has a vacuum tolerance of -0.8 bar. The hose meets RMA CLASS 511-A for ID dimensional tolerance.
