

Engineering Slide Chart

Great Innovations

Great Innovations (Wasco, IL) has created a new reference tool for engineers, designers, drafters, and machinists. The Engineering Slide Chart includes technical information from many of the quick references that are commonly found in the work areas of mechanical designers and CAD users and all of this information is compiled for both English (Imperial) and Metric systems in a single screw chart. The chart is available in a durable plastic version and as an iPhone, iPad app, Android app, and soon on Android tablets. Great Innovations' screw chart serves engineers throughout their careers and is rapidly becoming a helpful time saving industry standard, says the company.
