## Pistol-Pro Gun

Miller

**Miller** (Appleton, WI) has introduced the new XR™-Pistol-Pro Gun built for aluminum MIG and Pulsed MIG welding in heavy industrial applications. Compatible with Miller XR-S/D Control, XR-AlumaFeed™, and Millermatic® 252 and 350P models, the XR-Pistol-Pro Gun is a push-pull gun designed specifically for use with aluminum wire and other soft alloys where wire feeding consistency is critical. The new gun features an improved motor and drive design for better arc consistency over longer distances that also helps reduce downtime and maintenance costs associated with complex drive systems. This gun features more than 20 head tube options (sold separately) in different lengths and bend configurations to ensure optimal welding performance and access for every application.
