

## Refrigerant Leak Detector

Testo

**Testo** (Sparta, NJ) has announced the release of its new refrigerant leak detector, model 316-3. This hand-held detector delivers optimal sensitivity to all refrigerants, up to 0.15 oz/year, yet is resistant to contaminants such as dust, dirt, and oil, according to the company. The product features a heated diode sensor, one button operation, and LEDs that illuminate progressively to show leak size and an audible alarm. The high/low sensitivity adjustment features allows users to decrease sensitivity to pinpoint leak sources. The 316-3 also features an automatic background adjustment, or zeroing, to compensate for refrigerant build-up. Each meter is backed by two year warranties and full customer service support and calibration assistance.
