

## Energy Data Logger

AEMC

The PEL 100 series from **AEMC** (Foxborough, MA) is a low cost, simple to use, one, two (split phase) and three phase (Y, delta) power and energy data logger. There are two models available; Model PEL 102 (no display) and Model PEL 103 (with a backlit digital display). This product is ideal for electricians, engineers, and contractors doing work in the area of building and system monitoring and upgrades, as well as residential and overall energy audits. All vital energy data is easily measured, recorded, and analyzed. Reports can be generated with confidence with minimal configuration time and effort, says the company (Standard and Customizable Reports supplied).
