

High Precision Welding Tables

Strong Hand Tools®

Strong Hand Tools® (Pico Rivera, CA) is now an Authorized U.S.A. Distributor of German-made, High Precision Siegmund Welding Tables for heavy duty fixturing applications. Siegmund Welding Tables feature a one piece, five face design with a 25 millimeters thick reinforced steel plate for a rigid and flat work surface with a load capacity of 3.5 tons and flatness within ± 0.3 millimeters. Precision CNC machined 25-millimeter diameter horizontal and vertical holes cover the five faces of the tabletop in a 100-millimeter grid pattern for optimal flexibility in the design and set-up of fixtures. Visible grid lines on the tabletop help users align and position workpieces for fixturing.
