

Microcontroller Smart LCD

EarthLCD

EarthLCD's (Costa Mesa, CA) ezLCD-313 is a 3.5-inch smart, transfective, color LCD with touch screen capability targeted for indoor, outdoor, and high-ambient light applications. The third-generation smart LCD works with any microcontroller, including Arduino, and offers industrial users and OEMs a highly-functional, flexible, and cost-effective alternative to buttons, character modules, STN displays, switches, and more complex graphical touch displays, says the company. The ezLCD-313 is ideal for automotive, avionic, embedded system, home automation, industrial control, instrumentation, kiosk, medical device, nautical, security, status monitoring, and video equipment applications.
