

Mobile Powered Workstations

Newcastle Systems

Ideal for warehouses, distribution centers, and many other facilities, NB Series Mobile Powered Workstations from **Newcastle Systems** (Middleton, MA) can save labor and improve productivity, says the company. These patented, ergonomic carts can carry computers, printers, scales, barcode scanners, and most other small electronic equipment to wherever they are needed. An on-board battery can power up to four devices simultaneously for 8-10 hours of normal use. Adjustable shelves can hold up to 75 pounds each. All necessary equipment can be brought to where the work is taking place and an operator can have real-time access to WMS, ERP, and automated data collection.
