

New Bolt Security

Nord-Lock

Nord-Lock (Elk Grove Village, IL) has added a new dimension of safety to bolt security with the launch of the Nord-Lock X-series washer, according to the company. X-series combines Nord-Lock's wedge-locking protection against spontaneous bolt loosening (due to vibration and dynamic loads) with an exclusive spring effect that protects against slackening due to settlement and relaxation. This combination makes X-series the first, true multifunctional solution—offering the highest security for critical joints, without compromise, the company says. Nord-Lock X-series can ensure total bolt security while simplifying design and maintenance since there is no need to use and stock multiple solutions.

For a video report on how X-series washers add a new dimension of safety to bolt security, visit www.nord-lock.com [1].
