

Personnel Cleaning Station

Guardair Corporation

Guardair Corporation (Chicopee, MA) has announced that the new Personnel Cleaning Station is now available through a nationwide and international network of distributors and dealers. The Personnel Cleaning Station (PCS) is a safe-to-operate vacuum designed to clean dust, powders, and debris off workers' clothing thereby eliminating the dangerous practice of self-cleaning with compressed air. Running off standard shop compressed air, the PCS pairs a proprietary, on-demand air-agitator brush attachment with a high efficiency pneumatic vacuum. Thumb switch activated, the air-agitator loosens and lifts particles airborne where the vacuum sucks them away safely and effectively. With no motor to burn out, the PCS is virtually maintenance-free. The unit mounts on any vertical surface, and is constructed from rugged polyethylene.
