

Remote Discharge Taps

GoatThroat® Pumps

GoatThroat® Pumps (New York, NY) has introduced the RT Series of Remote Discharge Taps, offering precise control of fluid delivery to point-of-use for low viscosity liquids. With a robust, all-thermoplastic injection-molded construction, the hand-operated RT Taps can deliver liquids at rates from drops to gallons to beakers, weighing scales, or day tanks from the original chemical source containers using either GoatThroat® Pumps or on-demand electric pumps with ½ inch inlet and outlet tubes. The RT Remote Discharge Taps offer:

- Food Grade Polypropylene construction
- Nitrile, EPDM, or Viton Seals
- 316 stainless steel or Hastelloy® 276 Springs and Screws
- Standard or through the wall installation
