

Vehicle Restraint Safety System

Pentalift

The RVR32 vehicle restraint safety system from **Pentalift** (Buffalo, NY) is a raised, face mounted, off the ground design. The front extension bar provides an operating range of 9 inches low to 25 inches high. The rotating steel hook design provides a 32,000 pound restraining capacity with a slip clutch to protect the drive components from impact and shock loads. The spring loaded carriage automatically adjusts to trailer movement “float” maintaining contact with the vehicle rear impact guard. A high visibility two way communication system provides communication between the dock attendant and the truck driver.
