

Advanced Control Foundation

International Society of Automation

The **International Society of Automation (ISA)** (Research Triangle Park, NC) has announced that it has produced a new book that explains the concepts and terminology of advanced control, and highlights the advanced control tools and techniques most widely and effectively applied in the process industry today.

Advanced Control Foundation: Tools, Techniques, and Applications by Terrence L. "Terry" Blevins, Willy K. Wojsznis and Mark Nixon is designed to help control engineers and process engineers gain a more thorough understanding of the concepts and capabilities of advanced control products and solutions, which have been proven to reduce variation in plant operation, achieve production targets, and improve plant production.

See the website that accompanies the book at www.advancedcontrolfoundation.com [1].
